Cellocator Division
Pointer Telocation Ltd.

Dear Valued Customer,   June 2014

Cellocator is proud to announce the following new products and information recently published in the Knowledge Base section of the Cellocator website:

CR300

The CR300 family is fully backward-compatible with the CR200 and introduces several advantages over the CR200, including the following:

- Additional 1-wire input allowing Driver ID/Trailer ID functionality, as in the Cello Family.
- Additional 1 digital input – meaning a total of 2 digital inputs.
- SiRFstarIV positioning engine for reduced acquisition time and better accuracy.
- Virtual Immobilization output can be defined utilizing one of the two legacy outputs (LED or Lights).
- A set of premium features which enhances the CR300 with advanced features and capabilities.

You are welcome to review the CR300 Web page and the CR300 Release Notes for further information.

The CR300 is released with FW31m. Its release package, including CSF files, PLs and Release Notes, can be downloaded from the FW Released Packages page.

Evaluation and Integration

- The Evaluation Manual has been updated with the CR300 family information. The Cellocator Programmer chapter has been removed to reduce the overall size of the Evaluation Manual.
- The new Cellocator Programmer Manual has been updated and now provides more accurate information.
- Please note that the Evaluation Suite, Protocol documents and Programming Manuals are updated from time to time without special notice.
