

PCN 0116 - CelloTrack T Modem and unit FW change

Dear Valued Customer,

PCN no. 0116
PCN type engineering change
Product CelloTrack T 2G Family
Date September 15, 2014

Change Notification Description

This PCN is being issued to notify customers about utilizing a new HW and FW version of the embedded cellular modem and device FW version 41o, which supports the new modem version, for the CelloTrack T 2G Family .

Change information

The modified CelloTrack T 2G family is fully backward-compatible with the existing one. No form, fit or function change have been applied. The only change is the use of an updated chipset version of the embedded Telit GE910-V3 cellular modem.

Cellocator has tested the modified product and validate that there is no impact on performance.

The products Part Numbers, product names and technical documents have not been changed. The FW41o Release Package will be introduced toward the transition date.

Cellocator will start shipping the modified CelloTrack T units instead of the existing one on October 2014. All modified units will be produced with FW41o.

Customer Considerations

Customers who use the replaced CelloTrack T 2G products should start considering the transition process to the new products upon receiving this announcement.

PCN 0116 - CelloTrack T Modem and unit FW change

In order to be prepared for the new products you are invited to order samples for evaluation. Please contact your sales personnel for more details.

For pricing and delivery information, you are most welcome to contact your appropriate sales manager.

Should you have any questions regarding this PCN, you are more than welcome to contact the product management department or your appropriate sales manager.

Kind Regards,

Natan Degani
