

PCN 0111 - Compact GPS Receivers

Dear Valued Customer,

PCN no. 0111
PCN type Engineering Change
Product GPS Receivers for Compact Family
Date December 20, 2013

Change Notification Description

This PCN is being issued to notify customers about utilizing the SiRFstarIV technology instead of the SiRFstarIII technology, which has recently been declared "end of life" by the chipset provider.

The PNs and products names have not been changed.

The products are fully backward compatible, except for NMEA streaming via the Compact unit serial port, which is no longer supported by the SiRFstarIV module.

The new technology delivers a reliable positioning engine with reduced acquisition time and improved accuracy. Cellocator has tested the modified products and can validate improved product performance.

Should you have any questions regarding this PCN, you are more than welcome to contact the product management department or your appropriate sales manager.

Kind Regards,

Natan Degani
