

Products & Web Updates Announcement

September 2015

Greetings! ,

This announcement is being issued to notify you about Cellocator product updates and information recently published in the Knowledge Base section of the Cellocator website.

Cello-GNSS

- The [Supported Vehicles Database](#) for the Cello-CANiQ has been updated with additional vehicles.
- The [CelloFamily Hardware Installation Guide](#) includes new information regarding the OBDII Y cable and the Information Specific to the Installation of Cello-CANiQ section has been revised.

CR300

The [CR300 Hardware Installation Guide](#) has been updated.

CelloTrackT

- FW41u for CelloTrack T introduces a number of new enhancements and bug fixes. The [FW41u for CelloTrack T Release Package](#), including CSF files, PLs and Release Notes, can be downloaded from the [FW & PL Released Packages](#) page.
 - The [CelloTrack Container Lock Overview](#) has been updated and posted in the [CelloTrack T Family](#) page.
-

Accessories

- **Cellocator 1-wire Temperature Sensor**

The 1-wire Temperature Sensor provides a low-cost, easy to install solution for cold chain transportation markets.

Each Cello unit can support up to 4 temperature sensors installed in different places in the vehicle, and communicate online to a telematics application the actual measured temperature values. The CR300 unit can support one temperature sensor.

Cellocator also provides several installation accessories to ensure professional, reliable and fast installation of several temperature sensors on the same 1-wire bus. The Cellocator unit and the 1-wire temperature sensor comply with EN 12830, allowing usage in applications which require compliance with this standard.

You are welcome to review the [1-Wire Temperature Sensor Overview](#) for more information.

- **Harnesses**

The [Harness Selection Wizard](#) has been updated following changes in units and harnesses.

Evaluation and Integration

- The [Evaluation Suite \(32/64 bits\)](#) installation file now supports 32 and 64 bit Windows OS in the same file.
 - Note that the Evaluation Suite Manual, Cellocator Programmer Manual, Protocol documents and Programming Manuals are updated from time to time without special notice.
-

Certification

- The Cello GNSS environment certificate has been updated.
 - The CelloTrack T environment certificate has been updated.
 - CR300 NB, CE Radio and CE GPS certificates and test reports have been updated.
 - These changes can be reviewed in the [Certifications & Reports Reference Table](#).
-

Due to a site server upgrade, all files which were posted before the upgrade have been re-dated to August 7, 2015.

For pricing and delivery information, please contact your Sales Manager.

Please note that the above links require access to the [Knowledge Base section](#) on our website.

Should you have any questions on the new products or changes, please feel free to contact the Product Management department or your Sales Manager.

Kind Regards,

Natan Degani
